

# THE LATEST WORD IN GAMES

## MY WORD!

The game for word lovers: easy to learn, easy to play, yet sophisticated enough to provide a lifetime of enjoyment.

In My Word! each player attempts to discover his opponent's Guesswords which gradually reveal the letters and their positions in the concealed Gameword. By the last turn of each round, if a player is clever enough, he will be able to correctly name his opponent's Gameword and score a special bonus. Higher score after two rounds of play wins.

## MONTAGE

Montage is a four-player partnership game-experience that combines the strategic excitement of crossword puzzles and word-guessing games with the pleasure of creating an original work of art as you play.

The game is played on a crossword style board; colored playing pieces are played on the board, each color representing a group of letters of the alphabet. The "quizzier" on each turn gives a clue for the word he wishes to play and indicates its location on the board. His partner and opponents then attempt to guess the word based on its length and the colored chips already in place.

Montage becomes a game of territory as each team vies for control of the nine "zones" to win the game.
